

Profile and investment policy

The GFH European Equity Fund (GFH Europees Aandelen Fonds, "Fund") is particularly suitable for private investors with an investment horizon of at least ten (10) to fifteen (15) years pursuing a high yield, without the desire to spread the risks across different asset classes. The objective of The Fund is to achieve returns through a balanced mix of European diversified equity, alternative investments and liquidities. The Fund has an average target return of 6-8% per year. The Fund invests primarily in European equities or similar instruments traded on a regulated market or any other market in financial instruments. The investments are spread over at least 20 individual securities and similar instruments. No specific distinction is made according to geographical origin or the economic sector. In addition, The Fund may invest through other investment vehicles, in alternative investments.
